### Description

If you want to receive the latest updates on any topic, you need to create an account on Twitter. For this, you only need an email address or phone number.

- Test User Registration Feature: - Verifying that users can successfully create new accounts using valid email addresses or phone numbers and passwords compliant with security requirements.
- Test User Authentication: - Confirmation that registered users can access accounts using the correct email addresses and passwords.

### Description

Twitter has effective search features to help users find anything on the platform. Although tweeters post numerous media content, you can find any video with the help of a video search on **Twitter**. It doesn't matter how long ago a user posted a video, you can find it on the platform, provided it is still live. You just need to remember a few details about the video.
